

Go improve the world together with us!

One Lease One Tree

Did you know that 1-2 % of the world's forests disappear annually? And that 20% of climate change is due to deforestation? That is more than what the entire transport sector is responsible for. We cannot run out of trees! If you don't have time to plant trees, Athlon Sweden will help you contribute.

Athlon Sweden wants to work in the best way possible in order to improve the world for all our relations as well as contribute to a sustainable development of our world.

We are already feeling the effects of climate change in different ways. One of the biggest contributing causes to the greenhouse effect is deforestation. Forests are not only vital resources for animals and plants but also for humans. The forests help people with, among other things, shadow, food, animal feed, fertile soil, clean air and medicine.

Athlon Sweden wants to contribute to the well-being of people and wild-life through our environment. That is why we have created an initiative called "One Lease One Tree".

By donating a gift to the aid organization **Vi-Skogen**, we will receive the help we need in order to plant a tree for every new leased car during 2018 as well as participate in the reduction of deforestation.

If you want to read more about Vi-skogen's work, please click on the link below:
